Agile Alliance Grant

Research Report – September 15, 2008

This report presents our publications and conference presentations which are based on our research work funded by the Agile Alliance. As can be seen, so far, the research results were presented in three conferences and two papers which present the research results were submitted.

We would like to thank the Agile Alliance for its generous support.

Papers

Refereed papers in conferences proceedings

Seger, T., Hazzan, O. and Bar-Nahor, R. (2008). Agile orientation and psychological needs, self-efficacy, and perceived support: A two job-level comparison, *Proceedings of the Agile 2008 Conference*, Toronto, Canada, pp. 3-14.

Submitted papers

Seger, T. and Hazzan, O. Software practitioners' adaptation of agile software development, Special Issue on Agile Processes in Software Development, *Computer Supported Cooperative Work*.

Hazzan, O. and Seger, T. Software practitioners' profile: The role of self-efficacy, *Communications of the ACM*.

Abstracts in conferences proceedings

Seger, T., Hazzan, O. and Bar-Nahor, R. (2007). How does readiness for agile development relate to team climate and individual personality attributes?, *Lecture Notes in Computer Science, Proceedings of Agile Processes in Software Engineering and Extreme Programming*, Volume 4536/2007Springer Berlin / Heidelberg, pp. 257-260.

Seger, T. and Hazzan, O. (2008). Questions we ask about software practitioners' adaptation of agile software development, *Proceedings of the 2008 Academy of Management Annual Meeting*, Anaheim, California.

Conference presentations

August 2007 How does readiness for agile software development relate to team climate and individual personality attributes?, Agile 2007 Research-in-progress Workshop, *Agile 2007 Conference*, Washington DC, USA.

August 2008 Questions we ask about software practitioners' adaptation of agile software development, *2008 Academy of Management Annual Meeting*, Anaheim, California.

August 2008 Agile orientation and psychological needs, self-efficacy, and perceived support: A two job-level comparison, the Research Stage, *Agile 2008*, Toronto, Canada.
