

Fact sheet:

In-House Scrum Training

Do you want to qualify yourself, your coworkers and employees in Scrum? Do you want to introduce new impulses - by trainers with real-life Scrum experience - into your organisation? Do you want to start with Scrum or improve your actual Scrum implementation? Do your coworkers and employees shall be able to receive a Scrum Alliance certification for their knowledge? Do you want to ensure optimal learning? Do you want to „do better Scrum“?

We know: You are not just another company. The answers to these questions are as individual as your organisation itself. That is the reason why we believe, that you should not chose an out-of-the box Scrum training. This fact sheet helps you to select and co-create the Scrum training you need:

The facts:

Success: We want to help you, your team, and your organisation to succeed. This is our highest condition of satisfaction and the main quality factor of our course design.

Objectives: We determine the objectives of the training with our clients in a preparation meeting. We ensure that the courses are embedded into your Scrum introduction and implementation strategy.

Preparation: The participants receive a couple of tasks and a questionnaire before the course. This allows us to use the time in the course more efficiently. We are also your partner in organisational questions around your training.

Andreas Schliep

Trainers are Certified Scrum Trainers Andreas Schliep and/or Peter Beck. We belong to the small group of Scrum pioneers in Germany, starting with Scrum back in 2003. Our own Scrum stories are full of successes and failures. We share the experience with you.

1800+ *Certified ScrumMasters* and *Certified Product Owners* have been successfully trained by Peter Beck and Andreas Schliep so far.

3 days instead of 2 days: Scrum is easy to learn but hard to do. We know the challenge. Our 3 day courses ensure: the participants are ready to apply Scrum.

Scrum: We adjust the course content and exercises to the needs of the participants during the training. We do not merely preach Scrum, we practice it!

Interactive: A core principle of Scrum is „learning by doing“. This principle is implemented in our courses by interactive simulations and modern learning methods.

Together: Scrum means being „tightly together“. We produce the best results, if all stakeholders and team members work tightly together in the training. Developers, Product Owners, ScrumMasters, managers, customers, users... they all lean together. The Scrum Team and the organisation are immediately ready to start with their first Sprint; or apply the discovered improvement opportunities to their existing Scrum environment.

"Scrum-ourselves": How do we apply it in our organisation - the question of questions. We help our participants to find answers in an individually tailored section at the end of the training.

Certification: Depending on the main theme of the course, the participants qualify for the **Certified ScrumMaster** or **Certified Scrum Product Owner** certifications by *Scrum Alliance*.

Retrospective: Actually, we are learning and improving ourselves with each training. We evaluate the course after the event and determine useful approaches for follow-up events and organisational improvements.

Coaching: We do not have to leave you alone after the training. The Scrum training itself is an important and valuable step towards your success. Alas, the newly gained energy and innovation power can dissolve pretty quickly without coaching and consulting. We are glad to be your coaches and advisors before or after the training.

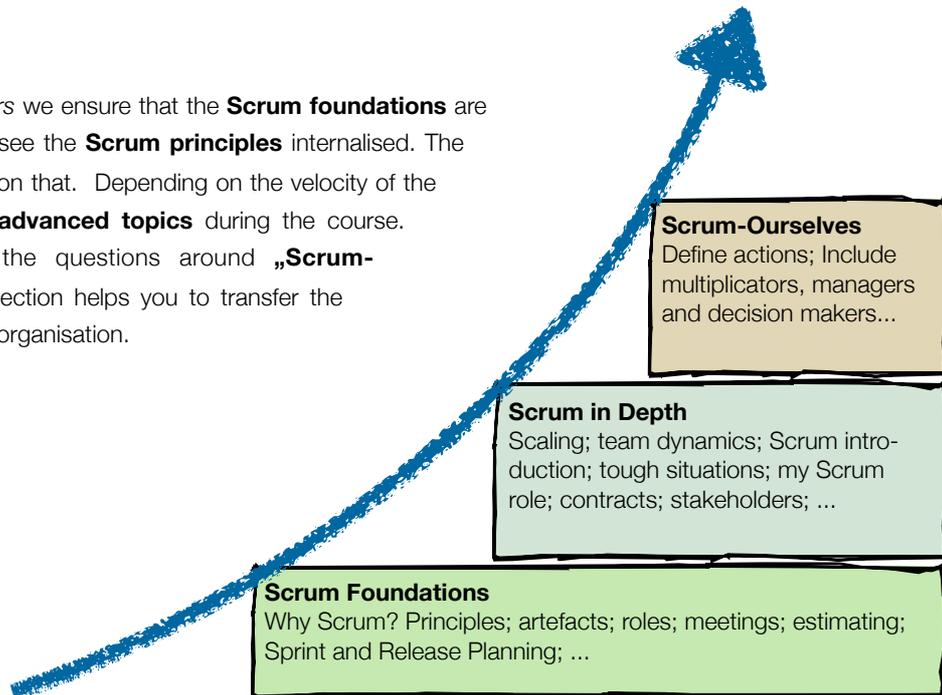

Peter Beck

The Content:

As *Certified Scrum Trainers* we ensure that the **Scrum foundations** are understood. We want to see the **Scrum principles** internalised. The participants can build up on that. Depending on the velocity of the group, we take care of **advanced topics** during the course. They help to answer the questions around „**Scrum-Ourselves?**“. The final section helps you to transfer the new knowledge into your organisation.

The Alternative:

Use our public training program on www.dasscrumteam.com: The advantages speak for themselves:

Beyond your own nose: See what is happening outside of your company. Come back with new ideas and perspectives.

Learning environment: We ensure a training location that supports optimal learning.

Combination: The trainer and coach supports your work after the training by coaching sessions and workshops. Read more about our coaching approach at www.dasscrumteam.com/coaching.

Effective: The „return on time invested“ factor of an open course is pretty high. If you want to register a group at one of our public courses, do not hesitate to ask about our coaching client and group discounts.

What Our Participants Say:

„DasScrumTeam designs their CSM class quite varied and exciting, so that many aha-effects happen with the participants. That is pretty motivating. Through their tremendous expertise, the trainers are able to find a pretty good reply to any question. Continue that way!“

„Very well constructed training, that introduces Scrum by doing it in a well-balanced mixture of theory and many practical exercises. The trainer occasionally take care of individual requests, and provide hints and tricks for practical implementations.“

„Pretty refreshing way to run a training. Congratulations!“
