

AMCHES IS AGILE

TODAY'S IT CHALLENGE

Changing requirements, changing objectives, limited budgets and limited time - these are just some of the challenges facing today's organizations. While Agile methodologies provide the tools to address these challenges, they are not a panacea. Effectively applying Agile, to be agile, requires knowledge, experience and a commitment to quality.

Some of the challenges:

- Managing limited resources across multiple objectives
- Quantifying technical debt and reducing it
- Scoping and estimation
- Transparency and communication
- Addressing and combating Software Entropy
- Managing dependencies as priorities change

OUR APPROACH

Amches understands today's challenges, and we provide the solutions to address them. For more than a decade we have been providing Agile support to critical, mission essential software applications in support of national defense. Amches has led the way in ensuring our customers are successful through the effective use of Agile in project management, software development, systems engineering and lifecycle support. We have dedicated, industry-certified experts ready to help you be Agile.

- Industry-certified personnel including Certified Scrum Masters, Product Owners, and Scrum Professionals
- Software Engineers, Project Managers and Systems Engineers with expertise in Scrum, Extreme Programming (XP), Feature-driven Development (FDD), Kanban and Lean
- Accomplished coaches to help new teams get started and existing teams overcome hurdles
- Proven Amches methodologies for Agile software and system engineering, and project management
- Expertise with leading Agile tools such as VersionOne, Rally, JIRA and the Atlassian tool suite

*Contact us today to learn more about Amches, and how we can help you...
become truly Agile.*
