Forget about Facetime
Let's work on a submission for the Hyperloop design competition (self.spacex)

submitted 9 months ago by self-assembled

I've just made a subreddit (/r/RedditLoop) where we can collectively design a pod for the upcoming competition. The schedule put out by SpaceX is ambitious so we'll need to work quickly. We need broad design, aerodynamic simulations, discussions about compressors, parking, doors, energy consumption, aesthetics, and more. I'm no master engineer myself, but I believe I can help get us started and organize open problems for reddit.
Great internet & equipment or you are doomed
Be deliberate about team building
Start small and iterate

Iterate. Then iterate again.
