

Neek Consulting, an established Small Business (SWaM), is a full service, full life-cycle management and information technology consulting firm providing innovative and customized technical solutions to its federal, state, and commercial clients in the Washington DC Metro Area.

Neek focuses on helping its clients design success through enterprise solutions and business agility. We utilize our extensive experience and combine it with our Agile approach and enterprise IT services to help organizations envision their potential, enable their stakeholders, and elevate their teams to achieve success. Our areas of expertise developed to meet the needs of the current IT industry and continually adapt to more modern technologies. Neek offers a wide range of solutions in different areas and within each capability, we are committed to achieving our objective (*Client-Focused!*) by reducing costs, increasing productivity, and solving complex problems through Engineering expertise and creative thinking.

SOFTWARE DEVELOPMENT & INTEGRATION At Neek Consulting, we utilize Agile process practices as a foundation for the Neek Consulting developmental process. Our experts provide the technical resources and experience required to develop applications that align with your business objectives while integrating with your current legacy offerings. We'll work with you throughout the entire development lifecycle, using DevSecOps best practices, from architecture and design to deployment, integration, and ongoing management.

IT MODERNIZATION Neek Consulting offers a suite of solutions and services supported by a range of modernization tools, centers of excellence, and proven implementation to help both public and private sectors modernize their IT systems, quickly, cost-effectively, and without any risks or disruptions. We drive real business value through transformational and consultative services that include Application Modernization and Migration, Platform modernization and Migration, Business Process Modernization and Migration, and Infrastructure Modernization and Migration.

ENTERPRISE APPLICATION CONSULTING Neek Consulting can help an enterprise digitally transform multiple front- and back office business processes, including customer experience (CX), customer relationship management (CRM), human capital

management (HCM), supply chain management (SCM), enterprise resource planning (ERP), finance and more. In so doing, we can help an organization to better share information, simplify IT processes, automate workflow, and improve IT flexibility.

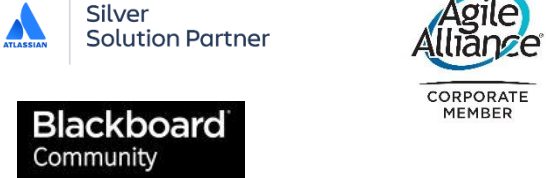

IT INFRASTRUCTURE MANAGEMENT & SUPPORT Neek Consulting can provide our customers with solutions that upgrade or integrate into their existing business model, improve performance, and help them prepare for the future. Our IT Infrastructure and Support solutions including Network Engineering, Information Assurance, and Network Security.
